

JUPITER PEN KIT Instructions

Kit Features

- Smooth twist mechanism
- Parker™ style refills (RE-PARK)
- Overall length: 5-1/4"

Required Accessories & Materials

- 7mm mandrel
- 2-pc. Jupiter bushing set (PKJUP-BU)
- Drill bit – 3/8" (DB3/8)
- Universal trimming kit (BTRIMKIT9)
- Glue (We recommend the thick "gel" CA glue—GTHICK2)
- Sanding and finishing supplies

Diagram A - Parts and Assembly

BLANK PREPARATION

The Jupiter pen has a single tube measuring 2". **Cut** your blank approximately 1/16" longer than the tube to allow for squaring with the barrel trimmer. Use a medium drill speed to **drill** the blank. Raise the bit from the blank every 1/4" to 1/2" to allow the chips to clear from the flutes of the drill bit. Don't force the drill bit; use an even pressure and let the bit do the work. After drilling the blank, **sand** the exterior of the brass tube to roughen its surface and use CA **glue** to glue the tube inside the blank. Sand or barrel trim to **square** the ends of the blank.

TURNING THE PEN

Set up the mandrel as shown in Diagram C. The Jupiter pen's upper and lower bushings both have an outside diameter of .491" (see Diagram B). **Turn** the pen blank to the bushing diameter at the ends. **Sand** with abrasives and **finish** with your choice of polish.

ASSEMBLY

(Line up finished parts according to Diagram A)
To avoid damage to components when assembling, use a vise with covered jaws or one of WoodTurningz' pen presses.

1. Slide Clip onto Twist Holder followed by the Trim Ring.
2. Press Twist Holder and Clip Assembly with Trim Ring into the Tube.
3. Press Tip Assembly into the opposite side of the Tube.
4. Slide Refill Spring onto the Refill and drop through the Tube.
5. Screw Pen Mechanism into the Twist Holder.
6. Press Cap onto the Pen Mechanism.
7. Your pen is now ready to operate.
